

Tinnitus Australia (TA) is guided by the Tinnitus Australia Advisory Committee - a group of health professionals and people who are affected by Tinnitus who are interested and engaged in Tinnitus service provision and research. It is a collaboration of people working professionally, passionately, and ethically to eliminate the suffering experienced by people, their friends and families, due to tinnitus. The Committee meets regularly to shape the strategic approach of TA and provide advice to the CEO, Soundfair.

Tinnitus Australia Advisory Committee Members 2021

Myriam Westcott, BSc GradDipAud, member

Myriam Westcott is an Audiologist and Director of DWM Audiology, a private Audiology clinic based in Melbourne, Australia. Myriam specialises in tinnitus, hyperacusis, acoustic shock, tonic tensor tympani (TTTS) and misophonia understanding, evaluation and therapy.

She is committed to the development of innovative approaches to therapy, carries out clinically based hyperacusis and acoustic shock research with a number of peer-reviewed publications, provides medico-legal opinions and regularly gives presentations/lectures/training on tinnitus, hyperacusis, acoustic shock and misophonia.

She is a member of the Tinnitus Australia Advisory Committee and is closely involved with the Tinnitus Association of Victoria.
